Perhaps more than any other issue, gender identity has galvanised the queer community in recent years. The questions go beyond the nature of male/female to a yet-to-be-traversed region that lies somewhere between and beyond biologically determined gender. In this groundbreaking anthology, three experts in gender studies and politics navigate around rigid, societally imposed concepts of two genders to discover and illuminate the limitless possibilities of identity. Thirty first-person accounts of gender construction, exploration, and questioning provide a groundwork for cultural discussion, political action, and even greater possibilities of autonomous gender choices.
